The UK's number one ECR brand* is proud to introduce the stunning, new Sharp ER-A771 for all your hospitality requirements.

- ✓ Lightning fast processing
- ✓ Industry standard ethernet connection
- ✓ Optional contactless key

SHARP

FOCUS ON

ER-A771

Speed and power in a small footprint

Specially designed for busy hospitality environments, the compact Sharp ER-A771 gives you lightning fast processing speed for effective control of your business.

Deliberately designed to complement and enhance any hospitality location, this small closed POS terminal has a big heart, offering you a powerful performance based upon advanced software and ease of use.

Transactions are rapidly processed and transferred throughout the industry standard Ethernet network to give you rapid access to other terminal, PCs and the Internet[^].

Every function has tangible, practical benefits.

For instance, our Overlap Clerk function ensures staff – and more importantly your customers – aren't kept waiting to use the terminal if someone is already in the middle of a transaction while the time-saving, customer-friendly Bill Separating function enables each person in a group to pay individually.

And, of course, you have the contactless key option to give you 64-bit security for that extra peace of mind.

The small Sharp ER-A771 is ready to make a big impact on the way you run your business.

[^] For internet or pc communications other equipment is necessary

* Independently verified by Clarendon Reports 2003, which also confirmed Sharp was number one for product quality.
